

Got Broadband?

No?

This DVD will show you how others got there

Success stories now available on DVD

Nearly 100 rural Minnesota leaders from 48 communities and executives from the telecommunications industry in MN heard a bracing message - "**get broadband or stagnate**"- at the Blandin Foundation *Broadband Initiative: Keeping Communities Competitive* conference on January 13, 2004.

The conference heralded the release of *A Community Guide to Broadband Development* - a resource to help community leaders identify opportunities and strategies for broadband deployment in their communities.

Pioneering MN communities presented their success stories about how they "Got Broadband," and how it has made a difference in their local economy.

Now you can view these presentations along with
Dr. Robert L. Musgrove's keynote address
on this DVD.

Ordering this DVD will cost you only \$15, in return you will get the wealth of knowledge and expertise our speakers shared in January.
